

Data Science For Beginners Sketch notes

PROBABILITY IS THE LIKELIHOOD OF AN EVENT!

We use random variables to talk about events.

- discrete
- continuous

$P(X)$ = function that describes probability of an event X

Probability Distribution

STATISTICS IS THE SCIENCE OF ANALYZING DATA!

Understanding

- MEAN, VARIANCE, STANDARD DEVIATION
- MODE, MEDIAN, QUARTILES
- CONFIDENCE INTERVALS
- COVARIANCE & CORRELATION

STATISTICS & PROBABILITY!

LESSON 4

IT ALL STARTS WITH TABLES!

#	Name	Date	Type	Price
1	Apple	2023-10-27	Fruit	1.50
2	Banana	2023-10-27	Fruit	1.20
3	Orange	2023-10-27	Fruit	1.80
4	Carrot	2023-10-27	Vegetable	0.90
5	Broccoli	2023-10-27	Vegetable	1.10
6	Tomato	2023-10-27	Vegetable	0.70
7	Cucumber	2023-10-27	Vegetable	0.60

table of cities

(CITY, COUNTRY)

CITY ID

table of rainfall in / city

(rainfall ID, rainfall AMOUNT year)

SELECT
to RETRIEVE data from table

JOIN
to RETRIEVE data across tables!

Relational database built on organizing data into rows and columns (in tables) ...

then connecting data in different tables using common identifiers (Keys) to establish relationships.

WORK WITH RELATIONAL DATA

LESSON 5

WHAT DOES NOSQL MEAN?

UMBRELLA TERM FOR 'not SQL', 'not RELATIONAL' etc.

4 TYPES

- KEY/VALUE (hashtable)
- GRAPH DB
- COLUMNAR DATA
- DOCUMENT DATASTORE

Explore COSMOS DB fields + objects

LET'S TALK ABOUT SPREADSHEETS!

FILE-BASED DATA STORE
e.g. MICROSOFT EXCEL

WORKBOOK (file) contains WORKSHEETS (tab) composed of CELLS (data)

Explore the INVENTORY EXAMPLE

WORK WITH NOSQL DATA

LESSON 6

Python language

Pandas
Open source data analysis tool built on Python

Data comes in THREE FORMS

- TABULAR
- TEXT
- IMAGES

TABULAR

NumPy is a library for working with TENSORS

Pandas helps you manipulate DATAFRAMES

UNSTRUCTURED

Data processing of text

- Extract Keywords
- Extract object info
- Extract emotion

PROCESSING IMAGE DATA

OBJECT DETECTION

FACE DETECTION

IMAGE CLASSIFICATION

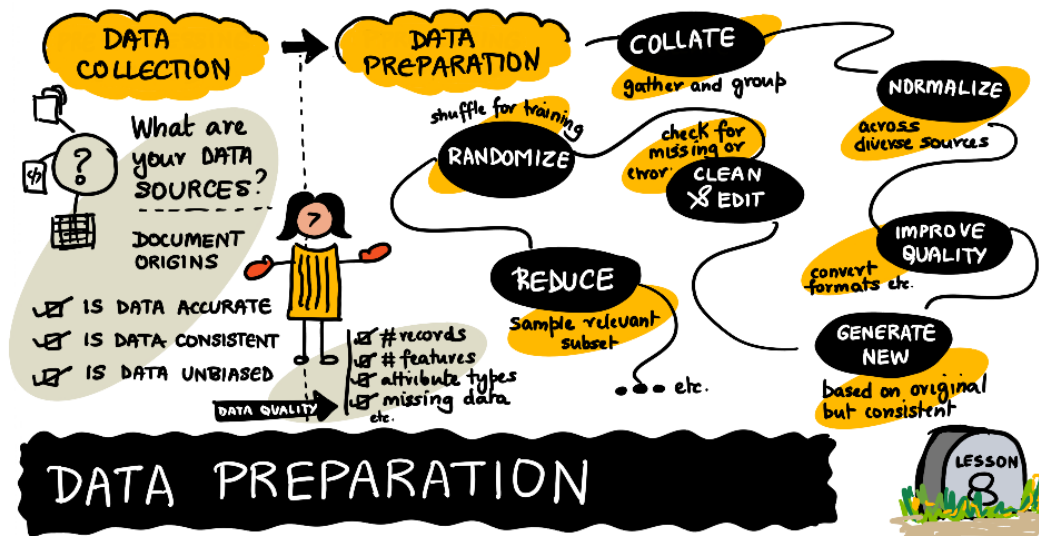

Matplotlib library for visualization

SciPy library for scientific functions

WORK WITH PYTHON

LESSON 7

HISTOGRAMS

* works on numeric data!

“How is the data organized along an axis of interest?”

VISUALIZING DATA QUANTITIES HELP COMPARE TYPES & DETECT OUTLIERS...

VISUALIZING DATA BY DISTRIBUTION (FREQUENCY) CAN GIVE DIFFERENT INSIGHTS...

“BUT WHAT IF MY DATA IS NOT NUMERIC? (e.g. TEXT)”

USE TRANSFORMS TO MAP TEXT VALUES INTO HISTOGRAM-FRIENDLY DATA

HISTOGRAMS ARE “STEPPE” ⇒ Granularity of bins gives sharp cuts.

WANT SMOOTHER VISUALIZATIONS? TRY DENSITY PLOTS!

seaborn - pydata.org
Python library #2

DATA RANGE DIVIDED INTO “BINS” TO SURFACE LARGER DISTRIBUTION PATTERNS.

DENSITY

0.010
0.005

Body Mass

Freq

50
100

LESSON 10

PIE CHARTS

DONUT CHART

WAFFLE CHART

WHAT IF I WANT TO DO COMPARATIVE ANALYSIS WITH VIZ?

THE AUDUBON FUNGI DATASET

LET'S EXPLORE THIS!

WANT TO COMPARE DATA PROPORTIONS BY ATTRIBUTE (e.g. 'class')

3 VISUALIZATION OPTIONS

What proportion of mushrooms are poisonous?

51.8
48.2

POISONOUS

PROPORTIONS OF VARIOUS HABITATS

= Pie chart with center removed
CLARITY

EASIER TO READ WITH MORE SECTORS.

Visualize as 2D array of squares - good for visualizing PROGRESS or when population is too VARIED for pie!

PyWaffle.py

DATA ATTRIBUTES

- CLASS
- CAP SHAPE
- CAP SURFACE
- BRUISES

In object form ... do the conversions first

LESSON 11

RELATIONSHIPS BETWEEN TYPES OF MONEY

VISUALIZE DATA TO UNDERSTAND RELATIONSHIP BETWEEN TWO OR MORE FACETS

DOES X CHANGE WITH Y? AND IF SO, HOW?
 How do variables relate to each other?
 e.g. "Does price of honey vary with state of origin?"

SEABORN pkg

VISUALIZING RELATIONSHIPS

HOW DO YOU CHOOSE THE RIGHT CHART TYPE - ?

- TRENDS OVER TIME = LINE
- COMPARE CATEGORIES = BAR, PIE
- COMPARE TOTALS = PIE, STACKED BAR
- RELATIONSHIPS = SCATTER, LINE, FACET, DUAL LINE
- PROPORTIONS = PIE, DONUT, WAFFLE

AVOID CHART DECEPTION

- HONEST DATA + DISHONEST REPRESENTATION
- * MANIPULATING AXES, COLORS
 - * COMPARING THE INCOMPARABLE
 - * INADVERTENT COLOR CUES

STYLE CHART FOR READABILITY!

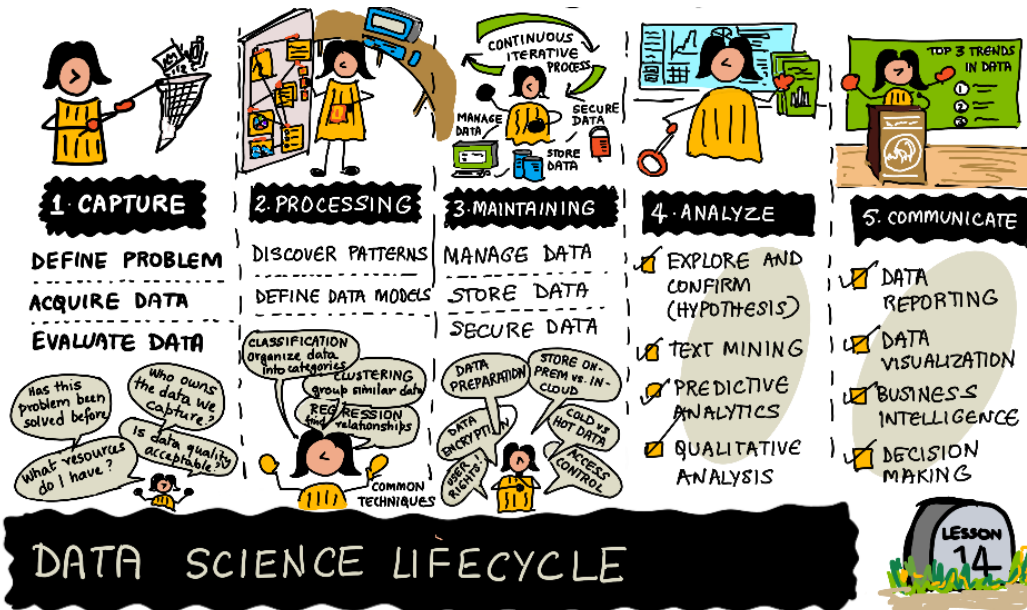

- * Label axes, Add legends
- * Scale axes, Angle text

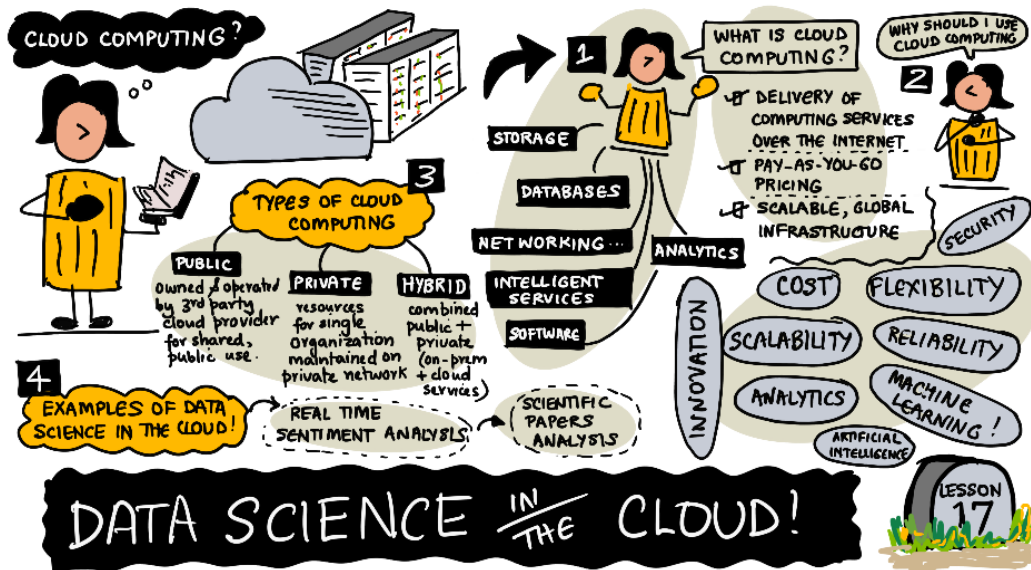

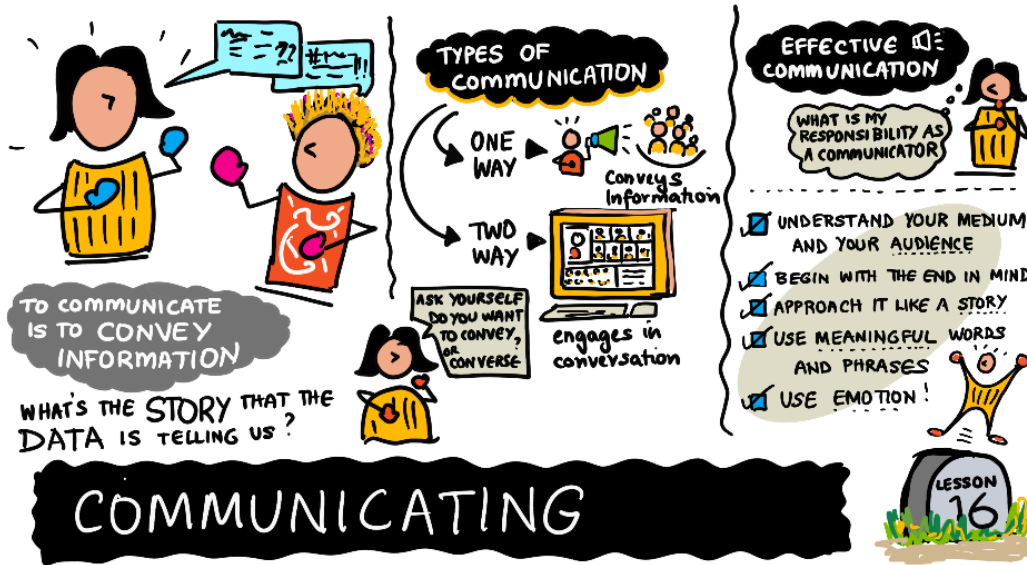

EXPLORE ANIMATIONS AND 3D CHART DISPLAY OPTIONS ...

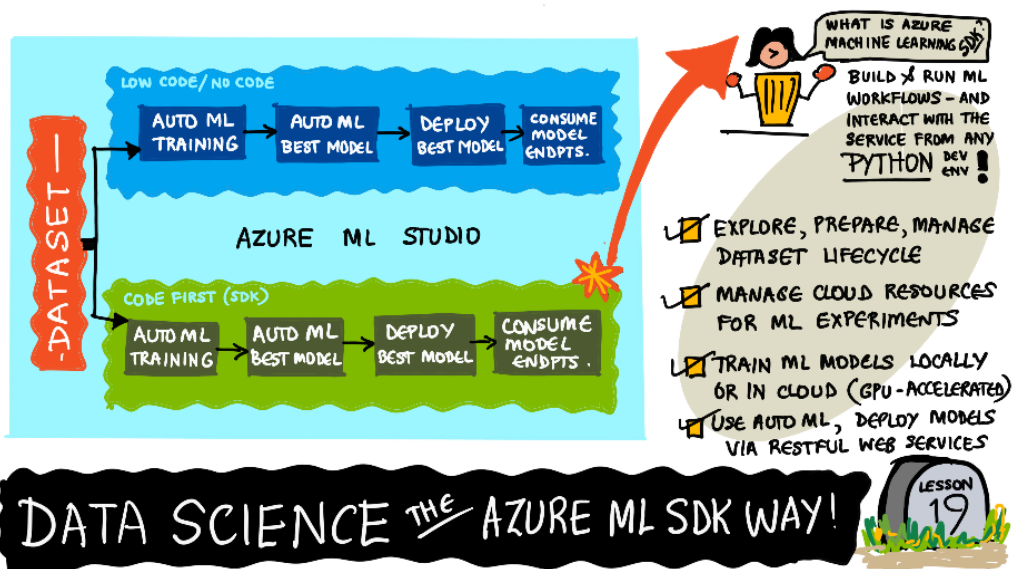

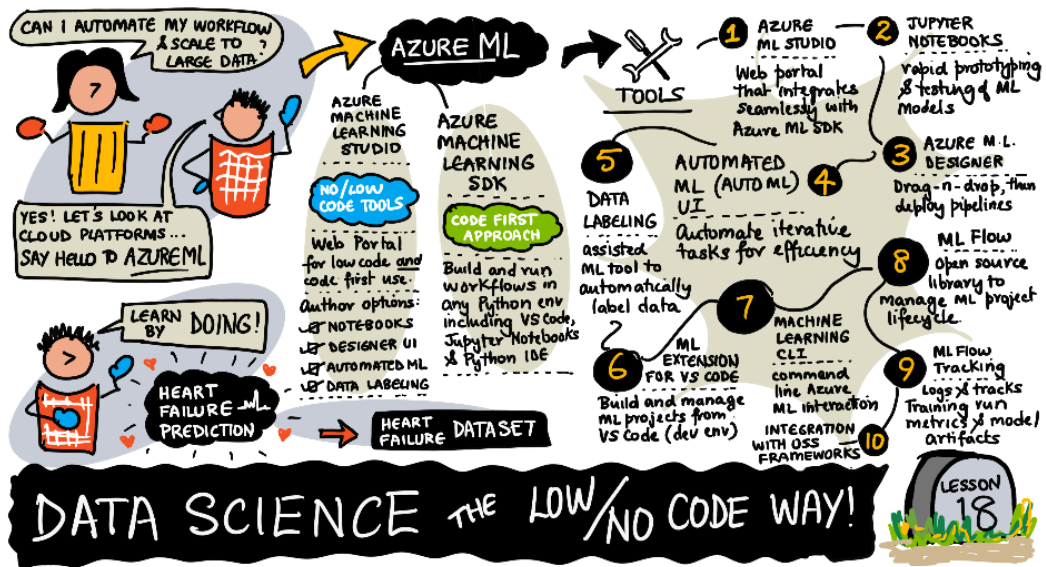

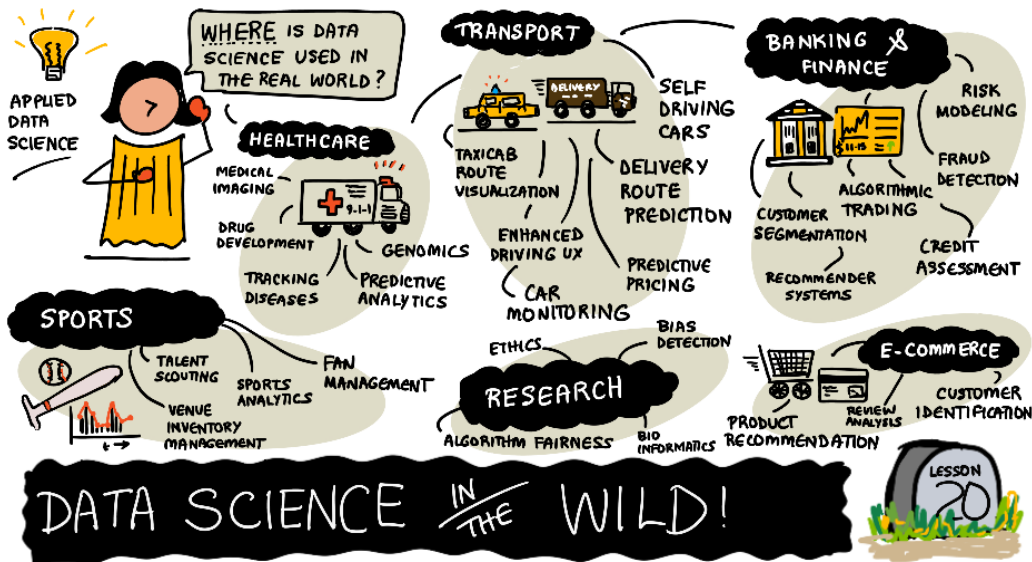

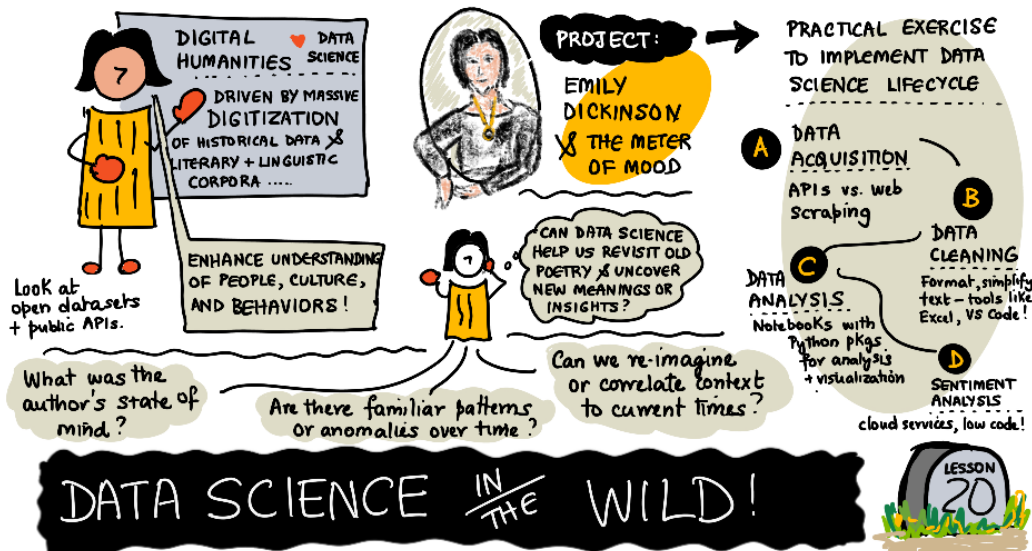

MAKING MEANINGFUL VISUALIZATIONS
